

Zola Suite is a completely cloud-based practice management solution with best-in-class practice management tools including:

- Robust billing (including the option to send bills via email or a secure client portal)
- Complete business and legal accounting.
- Sophisticated Calendar, Task, Email and Document Management

Users can access all tools from any device (including via iOS and Android Apps) with internet access.

To ensure you're equipped for success, we are offering members of the Connecticut Bar the following:

A free Zola Suite subscription to all members of your team for 90 days (we're happy to extend this, if you're still unable to work from your office after three months). At the end of the 90 days, we will work with you to export your data so it can be imported back to your on-premise solution, if applicable, or we can easily convert your account to a full subscription if you'd like to continue using Zola Suite. No strings attached.

Complimentary core data migration. Our data operations team will work with you to extract and move your contacts, calendar, and high-level matter information from your current practice management application (platforms include Time Matters, Timeslips, PCLaw, Tabs, ProLaw, Abacus, Amicus and more) to Zola Suite, at no cost to you, so you're not starting from scratch.

Unlimited remote training and client support. The thought of getting started with a new practice management solution can be overwhelming. Our team is fully operational and ready to help you by providing new user training and ongoing support.
