Subject: "Black boxes" question

Judge Bright:

This is in response to your Rules Committee referral of September 22nd, pertaining to whether or not automobile "black box" data recorders should be incorporated into standard discovery.

The matter was discussed at the Litigation Section meeting of September 26th. Following discussion, the sense of the group was that such production should not be automatically required, but rather, the need for such production should be considered on a case-by-case basis.

This position was considered and approved as an official Section position at the October meeting of the CBA's Legislative Policy and Review Committee.

I look forward to seeing you tonight.

Bill O'Sullivan
